TECHNICAL SKILLS

Languages: C# • JavaScript (ES6+) • TypeScript • SQL • Java • Python • HTML5 • CSS3 • Dart

Frameworks & Libraries: .NET • React.js • Next.js • Flutter • Node.js • Express • Spring Boot • Angular

Databases: Microsoft SQL Server • Firebase • PostgreSQL • MySQL • MariaDB • MongoDB

Testing & Quality: Jest • SonarQube • Code Reviews • CI/CD • Agile / Scrum

Tools & DevOps: Git • GitHub Actions • Docker • Azure • REST APIs • Entity Framework Core • Webpack • Vite

EDUCATION

Bachelor of Computing Honours | University of Guelph

Sep 2019 – Aug 2025

- Major in Computer Science (Co-op) | Minor in Mathematics

WORK EXPERIENCE

Teaching Assistant | University of Guelph, Guelph, ON

Sep 2023 – Dec 2024

- Supported 100+ students in CIS*2030: Structure and Application of Microcomputers, covering assembly language programming, hardware interfacing, and low-level debugging
- Developed strong technical communication skills explaining complex concepts clearly to learners with varied backgrounds — directly applicable to code reviews, pair programming, and cross-functional collaboration

Software Developer | Juice Inc., Guelph, ON

Jan 2024 – Aug 2024

- Built and shipped a full-stack authentication system with Firebase Authentication and Realtime Database, enabling secure login and RBAC-based access control for 50+ users while reducing authentication errors through custom input validation and XSS prevention
- Collaborated with designers and PMs in Agile sprints to translate evolving product requirements into clean, maintainable technical solutions delivered on time

Junior Programmer | Deleptual, Toronto, ON

May 2022 – Dec 2022

- Maintained and improved 5+ production React.js client applications, reducing bug reports and improving cross-browser consistency by debugging compatibility issues and shipping client-requested updates under real delivery timelines
- Modernized legacy codebases including build tooling migrations and dependency updates, improving developer experience and reducing technical debt across client projects

PROJECTS

Westgate Pension | C#, .NET 10, ASP.NET Core, Entity Framework Core, SQL Server, React, TypeScript, Tailwind CSS, Azure, Docker, GitHub Actions

Mar 2026

- Built a full-stack pension administration platform with role-based member and admin portals; implemented JWT authentication with RBAC, BCrypt password hashing, and a layered ASP.NET Core architecture with clean separation of controllers, services, and data access
- Designed a normalized SQL Server schema using Entity Framework Core code-first migrations; configured CI/CD via GitHub Actions for automatic deployment to Azure App Service and Azure SQL — live at westgatepension.may-nguyen.ca

Lipht — Fitness Tracking App | Dart, Flutter, Firebase, OpenAI API, fl_chart, Provider

May 2025

- Built a cross-platform mobile app in Flutter with Firebase Authentication and Firestore backend; implemented real-time data streams, complex state management across five feature tabs, and an AI-powered meal analysis feature using the OpenAI API
- Applied repository pattern for data abstraction and modular code structure across features, services, and providers — source: github.com/maynguyen26/lipht

Personal Portfolio Website | Next.js, TypeScript, React, TailwindCSS, Framer Motion

Dec 2022 – Present

- Designed and built a fully responsive, server-side rendered portfolio with Next.js App Router, TypeScript, and TailwindCSS; implemented smooth Framer Motion page transitions, mobile-first CSS architecture, and a custom design system — live at may-nguyen.ca

LEADERSHIP & COMMUNITY

Club Administrator & Team Captain | Gryphons Ultimate Club, University of Guelph,

Sep 2021 – Apr 2024

- Led 75+ member varsity club for four years managing operations, scheduling, budgets, sponsorships, and logistics; guided team to 5th place nationally in Canadian University Division I and received MVP award
